VISION

Aspiring cybersecurity professional focused on developing expertise in threat detection, security operations, and defensive security with the goal of becoming a Security Engineer who builds resilient and secure digital systems.

EDUCATION

Bachelor of Technology, Computer Science and Engineering
REVA University, Bengaluru, India | CGPA: 7.3

Sep 2023 – Present

EXPERIENCE

Technical Member | Dev/Track

2024-2025

- Contributed to two end-to-end project cycles — one in web development as a web scraping developer, and another in the UI/UX domain as a product designer.
- Applied design principles to create clean, functional, and visually engaging interfaces.
- Developed a strong balance of technical and design skills, with a focus on delivering solutions that are both data-driven and user-focused.

PROJECTS

Real-Time Log Analysis Dashboard

Nov 2025

GitHub: [Cybersec prjcts](#)

- Built a real-time log anomaly detection system using PySpark and machine learning to identify unusual server behaviour as it occurs.
- Processes large-scale logs, applies a hybrid Isolation Forest and graph-based analysis, and displays live alerts through an interactive dashboard for proactive system monitoring.

DocVerify

Apr 2026

GitHub: [DocVerify](#)

- Decentralized platform built on Scaffold-ETH 2 that enables users to secure documents by pinning them to IPFS via Pinata and anchoring their SHA-256 fingerprints on the Ethereum blockchain for immutable verification.
- Features a modern Next.js dashboard for seamless document uploading, cryptographic integrity checks, and real-time on-chain registry management.

InternShield

GitHub: [InternShield](#)

May 2026

- AI-powered platform that verifies internship offer letters and detects scams using hybrid LLM analysis and real-time community signals. Built with Next.js and MongoDB.
- Empowers students with high-fidelity trust scores, ATS resume optimization, and actionable career insights to ensure a safe job search.

ACHIEVEMENTS

Smart Bengaluru Vision Ideathon 2025

Nov 2025

Shortlisted among 150+ teams for proposing a scalable online fraud detection solution using data-driven analysis and anomaly detection techniques, demonstrating strong system design and analytical skills.

CORE SKILLS & TECHNOLOGIES

Technical Skills: Python, C, Java, SQL, Figma, Nmap, Wireshark, Linux

Soft Skills: Teamwork, Problem Solving, Adaptability, Curiosity / Self-learning

Certifications: Google Cybersecurity Professional, Cisco Introduction to Cybersecurity

Interests: UI/UX Design, CTFs, Photography
